## PREFACE

By launching the publication "Municipalities and regions of the Republic of Serbia, 2015", the Statistical Office of the Republic of Serbia carries on with issuing annual statistics on municipalities, cities and regions of the Republic of Serbia. Our decision to establish a publication that comprises the data of various aspects of social and economic development of Serbian municipalities, cities and regions came from our appreciation of the social requirements for an overall insight of the status and development of certain municipalities, cities and regions.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality, city and region. Considering the contents, coverage and presentations, this is actually a complete statistical yearbook of municipalities, cities and regions.

In presenting the data we took into account the present organization of the Republic of Serbia and its administrative bodies. Territorial distribution is presented in accordance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

A wider selection of the data presented by municipalities, cities and regions which this publication could not possibly comprise, could be found in certain volumes of the "Bulletin", the summary of which can be found at the end of the publication. At the Statistical Office of the Republic of Serbia, in Belgrade head office and at its regional offices, we keep filed more detailed statistical data that were not published, but are available to the interested clients. The data are offered in printed and electronic form (series 1997-2014 available at SORS website).

Apart from the data of the SORS, the publication contains the data provided by the Ministry of Interior of the Republic of Serbia, Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia.

Final and selected results of 2011 Census of Population, Households and Dwellings and 2012 Census of Agriculture are presented in this publication, by municipalities, cities and regions.

In order to provide an insight into the data of this publication for the wide range of users, the Statistical Office of the Republic of Serbia edited also a separate English version of the publication ("*Municipalities and regions of the Republic of Serbia, 2015*").

## **“Municipalities and regions in the Republic of Serbia, 2015” Main principles of editing**

### **Distribution of material**

The statistical material in this publication was presented following basically the same sequence as in the “Statistical Yearbook of Serbia”. Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering, Research and development and International review.

### **Data sources**

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of the following institutions: Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia. In the tables containing these data, given are the full titles of the data sources.

### **Coverage**

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production, excluding the cases where methodological changes appear.

### **Methodological explanations**

In a separate chapter of the publication, presented are the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition “Methodologies and standards” (SORS), i.e. “Methodological papers” (FSO) or on the website of the Statistical Office of the Republic of Serbia.

### **Technique of presentation**

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the observed phenomena were excluded. In the case of City of Belgrade, majority of data were presented so as to cover all municipalities.

The municipalities were divided here into administrative districts and data on cities were presented separately. It is to be noted that certain cities did not use the opportunity to establish the city municipalities. In this yearbook, the territorial distribution was presented in compliance with the Regulation on Nomenclature of Statistical Territorial Units (“Official Gazette of RS”, No. 109/09 and 46/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

<sup>1)</sup> Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

## METHODOLOGICAL EXPLANATIONS

### GENERAL INFORMATION

#### Sources and methods of data collection

The data on the total area of the Republic of Serbia, as well as the data on the area of regions, areas and municipalities were taken over from the Republic Geodetic Authority, as of January 1<sup>st</sup>, 2015. Since the new cadastre measurements are in process, the data on the area should be considered as provisional. The data on the number of cadastre municipalities were also taken over from the Republic Geodetic Authority.

The population estimates for the post- census 2014 were derived according to the population estimate as of the end of the previous year (December 31<sup>st</sup>, 2013) and the data on the results of processed statistics on natural and mechanical migrations of population in 2014.

The mechanical component of migrations covers the internal migrations only.

### SOCIAL SYSTEM

#### ELECTIONS AND COMPOSITION OF MUNICIPAL AND CITY/TOWN ASSEMBLIES

#### Sources and methods of data collection

The data on the results of the elections for the delegates to municipal and city/town assemblies, as well as data on delegates of regions and areas were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town.

#### Coverage

The elections are carried on the whole territory of RS. The lists of voters include all citizens aged 18 and over.

The elections for delegates were held on 6/05/2012. Together with the data from these elections, processed were the data from elections held in 2009 and 2010 (municipalities: Arandjelovac, Bor and Negotin). Moreover, included were all elections held from May 6<sup>th</sup> 2012 to September 13<sup>th</sup> 2015 (municipalities: Voždovac, Zemun, Zaječar, Kosjerić, Vrbas, Odžaci, Kovin, Pećinci and Medvedja).

#### Definitions

Elections for delegates were conducted according to proportional system and each municipality/town presented one electoral unit in elections for delegates.

The candidates for delegates are pronounced by political parties, coalitions of parties, i.e. civil groups. The municipal and city/town assemblies are single-home institutions and the mandate of delegates lasts four years.

Pursuant to the amendment to the Local elections law from 2008, the presidents of municipalities and the mayors of cities shall be elected by delegates of municipal and city/town assemblies and the candidates are pronounced by political parties, coalitions of parties and civil groups with the majority of elected delegates for assemblies.

### POPULATION

#### Sources and methods of data collection

The data on population for 2011 are shown according to the results of 2011 Census of population, households and dwellings.

The population number estimate in mid-year (as of 30 June) is calculated on the basis of data of population census, data on population increase and data on internal migrations.

Data on births, deaths and contracted marriages are compiled and supplied by registrars and data on divorces by the courts of respective jurisdiction.

#### Coverage

The statistics of births cover all births (live and still births) in the respective year. The statistics of deaths covers all death cases. The statistics of contracted marriages covers the marriages that have been legally contracted, i.e. entered into the register of marriages. The statistics of divorces covers all legally divorced, dissolved, null and void made marriages.

According to the legal provisions on registers, the cases of births, deaths and contracted marriages are entered into registers kept for the region where the respective events took place, regardless of the fact whether this is the place of residence of the concerning parties. When processed, the data are further re-classified according to place of usual residence and this is in compliance with the census concept of usually resident population.

It is to be noted that starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

2011 Census was not conducted on the territory of AP Kosovo and Metohija. In the municipalities of Presevo and Bujanovac, the decreased number in census units' coverage was recorded due to the boycott by the majority of Albanian national community.

## Definitions

**Population** For the purpose of determining the total number of population of a given area, it was in the 2011 Census that the concept of "usual residence" was used for the first time. According to this concept, a person's place of usual residence is the place at which a person alone (in case of one-person household) or with the members of his/her household, spends most of his/her time, i.e. daily night-rest, regardless of his/her legal residence. Thus, the total population of particular place includes persons who have lived in their place of usual residence for a continuous period of at least twelve months before the critical moment of the census, as well as persons who lived in that place for less than twelve months, but with the intention of staying there for at least one year.

**Age** In the tables of census data and vital statistics, the population was presented by age groups - complete years of age; e.g. the age group 0 – 4 comprises the children from the moment of birth to the completed fifth year.

According to the data of age, several important population sub-sets are derived: children aged below 7, school- aged children -compulsory education, age of 7-14, working age population (aged 15 – 64), and female fertile population (15 – 49), etc.

**National or ethnic affiliation** As in the previous censuses, in 2011 Census, the data on national composition of the population were collected on the basis of free declaration of population. According to Article 47 of the Constitution of the Republic of Serbia, citizens are guaranteed absolute freedom regarding the declaration on their ethnicity. Moreover, the same article states that citizens are not obliged to declare themselves on their ethnicity. In such cases, the enumerator was obliged to write the following answer: "Did not declare".

**Religion** The answer as to the religion in 2011 Census is the result of individual conviction based on one's comprehension of religion; thus, what mattered was the identification with the religion, but not the membership of a religion. According to Article 43 of the Constitution of the Republic of Serbia, citizens are not obliged to declare themselves on their religion. In such cases, the enumerator was obliged to write the following answer: "Did not declare".

**Mother tongue** As in the previous census, in 2011 Census, mother tongue was taken to be the language first spoken in early childhood, i.e. if several languages were spoken in the household, it was the language that the person considered to be his/ her mother tongue. Even though there was no note on this question, the persons were not obliged to declare themselves on their mother tongue and the enumerator was obliged to write the answer: "Did not declare".

For children under 15 years of age, data on ethnic and cultural characteristics have been given by parents, adoptive parents, or guardians.

**The highest educational attainment** The highest educational attainment is the school which a person completed, thus attaining his/ her highest educational level. Data on completed school relate exclusively to education attained in the official educational system, so that education attained in scope of non-standard programs, i.e. informal education (various types of courses organized in workers' universities, people's universities, etc.) is not counted. Persons who earned master and doctoral degree are shown in the group of tertiary education.

Data on the highest educational level are shown only for the population aged 15 or over.

**Legal marital status** Data on the legal marital status refer to the formal, legal marital status of persons. Answers to this question were provided by all respondents, including those living in consensual unions. Data on legal marital status are presented for persons aged 15 and over.

**Economic activity** In Census 2011 (as well as in Census 2002), the concept of so called current activity was used. According to economic activity, total population was classified into economically active and economically inactive.

**Economically active population** („labor force“) comprises persons who perform an occupation and the unemployed.

The contingent of **persons who perform an occupation (the employed)** comprises persons aged 15 and over who performed in the week before the census a job that was paid or would be paid (in cash or in kind), regardless whether the person had a formal and legal employment contract, only oral agreement with the employer or performed a job independently, as well as persons who had a job, but were, for objective reasons, not able to perform it in the reference week because of illness, holiday or vacation, strike or lock-out, etc.

**Unemployed** persons comprise persons aged 15 and over who did not work in the reference week, but were actively seeking employment and were willing to start working if a job would be offered to them within two weeks in relation to the „critical moment of the census“.

**Economically inactive population** comprises persons who, in the week before the census, did not seek employment nor had the opportunity to start working within two weeks if a job would be offered.

Contingent of **children up to 15** relates to persons aged under the official minimal limit for the economic activity.

The category of **pensioners** comprises economically inactive persons who acquired pension rights, regardless whether it is an old-age, disability, survivors' or farmers' pension.

Contingent of **persons who receive income from property** involves persons gaining income such as rent (renting house or flat, business premises), royalties (income from equity), etc.

The category of **pupils/ students** relates to all persons aged 15 and over who attend full – time or part – time school and who are not economically active nor recipients of survivors' pensions.

The category of **homemakers (persons engaged only in household duties in their own home)** comprises persons who are most of their time engaged in household duties in their own home.

The category **Other** comprises persons who cannot be classified in any of the above categories of economically inactive population (e.g. children aged over 14 not attending school and not seeking a job, persons incapable of work, persons who, in the referent period, were serving the prison sentence or detention measures etc.).

**Household** is every family or other people community of persons who live together and share their living expenses (habitation, food etc). Household is also any person who lives alone and is not a member of another household, regardless whether living in a separate or shared housing unit, in a single-person accommodation or as a tenant (i.e. one - person household).

**Family** is a union consisting of a marital or consensual couple, or parents (both or one) and their children. Thereby, a child is any person, regardless of the age and marital status, who lives in a household with one or with both parents and does not have a marital/consensual partner or his/her own child in that household.

**Live born** is a child that showed the signs of life (breathing and heart beating) after birth.

**Stillborn** is a child born showing no life signs, provided that pregnancy lasted longer than 28 weeks.

**Death causes.** The data on death causes are based on the concept of the main cause of death and it is defined as a disease or injury that caused the set of sick conditions which directly led to death, an accident or violence resulting in death.

The annual average was calculated as the arithmetical mean value of the number of the employed persons as of 31 March and of 30 September.

The data on employment and unemployed persons are obtained from the National Employment Service.

Therefore, as a reporting unit we anticipate every enterprise or institution with their business units at the territory of the municipality where the head office is seated and these units are engaged in the same principal activity. Business units with the registered main or principal activity other than that of the head office of enterprise or institution are considered as separate reporting units, even though they are situated on the territory of the municipality where the head office of the respective enterprise / institution is seated.

Also, as a separate reporting unit we consider any business unit that is situated out of the municipality where the head office of the corporate enterprise or institution is found.

The persons working under contract, performing temporary or occasional jobs are not considered as *employed*.

The prices of agricultural products are surveyed twice a month, generally in 3 to 7 stores and in market places (1 to 7 markets in a town).

Average monthly price for each item and service in a town is calculated by non-weighted geometric mean value of prices at several surveyed places. Average annual prices for industrial products and services are calculated by non-weighted geometric mean value of monthly prices and for agricultural products by weighting monthly prices of fresh vegetables and fruit with weights that present the quantity structure of the products sold in the respective month.

### Coverage

**Retail prices** are scanned in 15 towns: Beograd, Valjevo, Zaječar, Zrenjanin, Kragujevac, Kraljevo, Leskovac, Niš, Novi Sad, Pančevo, Smederevo, Sremska Mitrovica, Subotica, Užice and Šabac and they relate to 683 products and services.

Data on sewerage and remediation activities and the number of households connected to the sewerage network are collected by the Annual survey on wastewater from

settlements. Reporting units shall fill in forms in accordance with respective records and documents, and according to estimates when required. Data are collected annually, starting from 2005.

### Coverage

The data on water usage in settlements are collected from reporting units in charge of water supply and/or managing water usage systems. Surveys do not cover individual water supply (household supply) systems, which serve exclusively to certain households or household groups (up to 5 households). The data on purified and waste water are collected from reporting units responsible for managing public sewerage system.

Wastewater quantities do not include atmospheric water. Wastewater quantities are measured by water meters or estimated according to defined production standards.

The value of works relate to undertakings in referent year, i.e. accomplished and unaccomplished constructions. The value of works conducted by contractors is provided on the basis of annual balance statements, and the value of works undertaken by sole proprietors is taken over from the records of construction permits.
